

Bernalillo County Performance Management

Maria Zuniga, Operations Excellence Manager

Operations Excellence Office

Presentation at Colorado OpenGov User Group

9/24/19

Our Journey

- Bernalillo County
- Evolution of Performance Management
- Our Team
- Process Improvements
- Technology Leveraged
 - ✓ OpenGov Dashboards
 - ✓ Webpage Development
- Going Forward

Bernalillo County: Who we are

2600 employees

35 departments

650 million \$ operating budget

5 commissioners

5 elected officials

1160 square miles
Incorporates the **City of Albuquerque**

Located in central **New Mexico**

Bernalillo County: What we do & who we serve

Animal Care

Fire

Economic Development

Emergency Communication

Fleet & Facilities

Jail

Parks

Roads

Sheriffs

Technical Services

Zoning (Planning & Development)

676k residents

111k residents living in

unincorporated areas

of the county

Bernalillo County: Fun Facts

Where we started

- Budget & Business Improvement (BBI)

Leverage
technology (ERP)

Align Budget

Focus on user
needs

- BI focused on managing ERP projects
 - Major system upgrades & new functionality
 - User adoption
 - Established own project management methodology
- And then...technology functions moved to IT
 - ERP moved back to IT & BI role changed

2012 to
2015

And then...

- Business Improvement & Performance Office (BIPO)
 - Business Improvement team (all 3 of us) shifted focus to:

Strategic Planning

Performance Management

Business Improvement

Late
2015 to
early
2019

Where we are now

- Operations Excellence Office (OEO)

"Excellence is our middle name"

Our Team

- Team consists of...

- **Manager** – lead projects & program, design processes
- **Analyst** – technical design & analysis, process development & improvement, end user training
- **Specialist** – data specialist, technical & process support
- **2 interns** – contingent upon funding, provide support to web pages & dashboards

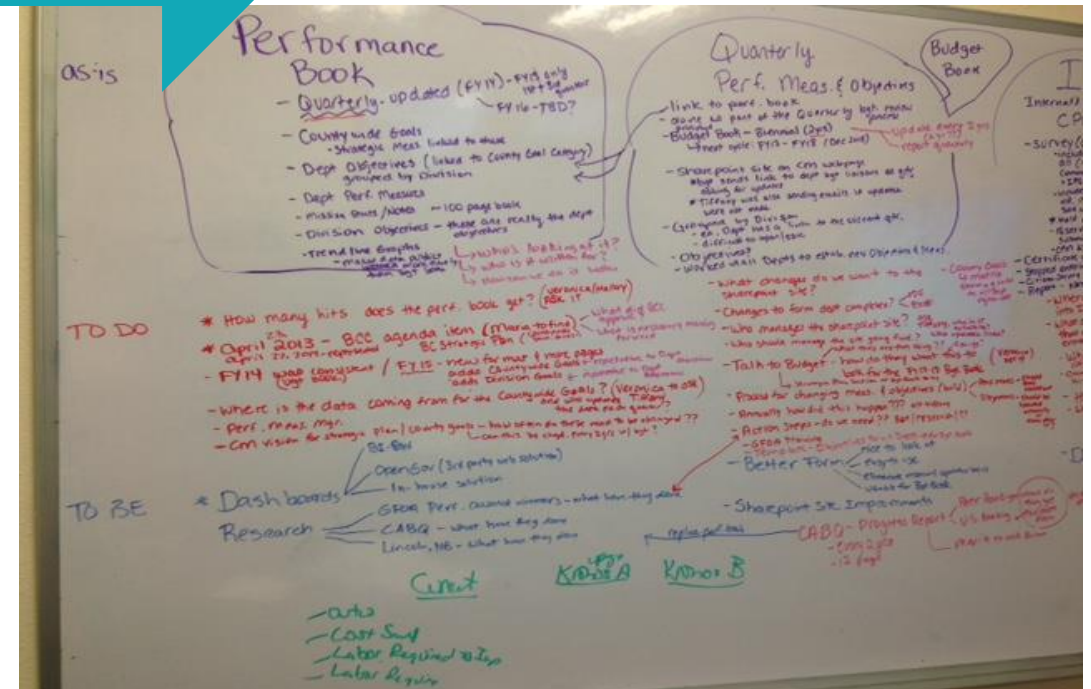

When BIPO was created...

- Analyzed Performance Management at the county

As is

To be

- Looked at
 - What did we do in the past?
 - What did we **have** to do?
 - What did we **want** to do?

Improving Performance Management

- All decisions made using these guiding principles...

**Do work that
adds value to the
organization**

**Only ask for data
that will be used**

**Track the most
important things**

**Make it to easy to
use & easy to
understand**

6 Areas Analyzed

- PDF book
- Almost no hits
- Tables of data not understandable

1 Performance Book

Performance Measures	Actuals Qtr. 1	Actuals Qtr. 2	Actuals Qtr. 3	Actuals Qtr. 4	YTD Actuals	2014 Target
New estates opened	199	193			199	500 EA
Pro Se filings	65.67%	69%			65.67%	60%
Total contacts	2,744	2,363			2,744	9,500 EA
Process electronic requests within 7 days	100%	100%			100%	95.0%
Outreach events per year	5	1			6	7 EA
People contacted through outreach events	230	8			230	250 EA

Need public to be involved...so far just a management plan

2 Strategic Plan

Bernalillo County Strategic Plan

- Mission Statement
- Strategies
- Results Statements
- Indicators
- Performance Measures

Results Categories and State	
1. Category: Government Accountability	Desired Result: County government is transparent steward of taxpayer dollars
2. Category: Public Safety	Desired Result: A community where residents are safe from crime and injury
3. Category: Public Infrastructure	Desired Result: Public infrastructure, support systems and services meet community needs
4. Category: Community Health	Desired Result: A community that is physically healthy, active and has access to cultural amenities
5. Category: Economic Vitality	Desired Result: A livable community

It would be helpful to have some examples of the outcomes

3 Budget Book

Performance Measures	2009 Actuals	2010 Target	2011 Target	2012
Square Footage Cleaned per employee	18,880.0 FT2	28,000.0 FT2	28,000.0 FT2	28,0
Quality Inspections p/employee p/month	2.0 EA	2.0 EA	2.0 EA	
Custodial Rqsts responded in 1 wrkg day	100.0 %	100%	98%	
Participate in Monthly Safety Meetings	N/A	N/A	12.0 EA	

- Tables of data
- Link to budget unclear
- Trends & link to strategic plan unclear

6 Areas Analyzed

4

Quarterly Reporting

Performance Measures	2009 Actuals	2010 Target	2011 Target	2012 Target
Square Footage Cleaned per employee	18,880.0 FT2	28,000.0 FT2	28,000.0 FT2	28,000.0
Quality Inspections p/employee p/month	2.0 EA	2.0 EA	2.0 EA	2
Custodial Rqsts responded in 1 wrkg day	100.0 %	100%	98%	
Participate in Monthly Safety Meetings	N/A	N/A	12.0 EA	12

- Performance an afterthought in quarterly budget reviews
- Who's looking, so why bother?
- Inconsistent, difficult to use forms
- Process undefined

5

ICMA

Q2.2. Population of the area served for Fire and EMS services.

Include:

- Individuals who reside within the boundaries of the official service area.
- Individuals from neighboring communities only if the jurisdiction is the official provider specified under contract or intergovernmental agreement.

Exclude:

- Individuals from neighboring communities who use the jurisdiction's facilities or services
- Tourists, commuters, and other short-term visitors.

Please note:

- If you checked "a" or "b" in the question above, then this number should be higher or lower
- If you checked "c" in the question above, then you should enter the official population of

Residential population

Fire Suppression

EMS

Technical Rescue

Hazardous Material

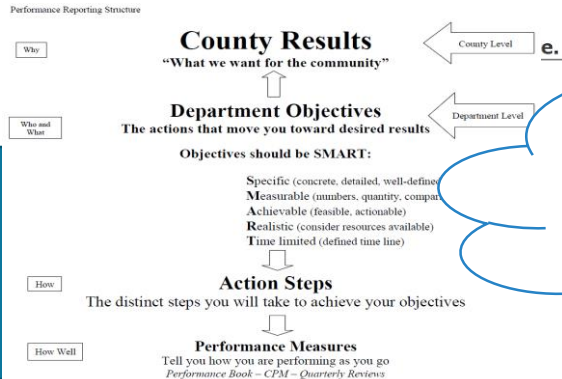

Square Footage of Facilities Maintained

- Extremely time consuming to enter data
- Comparison data difficult to find/use
- Benchmarks used as big stick
- Less than half of county services included

6

Training

- Not targeted to people who provide the data
- Forms difficult to use
- Process unclear

Result: Improve Process & Tools

Process

- Measure what matters!
- Ask departments...
 1. What does community want to know about dept.
 2. What does dept. want the community to know
 3. What does dept. want to learn about itself
- Transparency
- Accountability

Tools

- Dashboards!
 - Wanted interactive graphs that are easy to understand

P134-2: Answer 911 Calls within 10 Seconds FY19 (%)

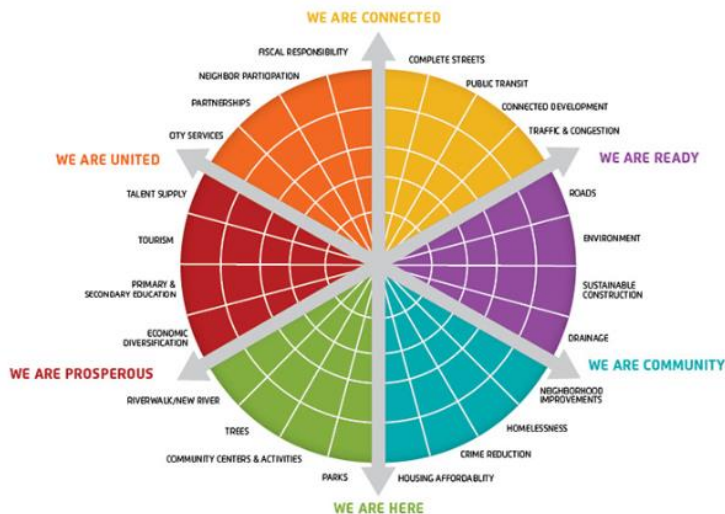

Research, research, research

- Find others already doing it well
 - What is their process?
 - Talk to them...ask them what worked for them & what didn't
 - Look at their websites
 - What tools are they using?

Department Performance
This dashboard is used to track the performance of all County departments and programs.

Researched Performance Systems

- Researched system agnostic tools
 - **BI, Information Builders, Socrata, OpenGov, Junar**
- Data for performance measures comes from everywhere
 - **SAP, Accela, NeoGov, Spreadsheets, etc.**
- Needed centralized system to gather & transparently report performance data
- Time spent entering gathering data needs to be worth the effort (output > input)

Dashboards needed to be...

- ✓ Easy to use
- ✓ Easy to understand

- ✓ Interactive
- ✓ Transparent

As Is

Performance Measures	Actuals Qtr. 1	Actuals Qtr. 2	Actuals Qtr. 3	Actuals Qtr. 4	YTD Actuals	2013 Target
Months closed within 30 days	3 EA	3	3	3	12	12 EA
Published financials by Dec 31	n/a in 1st qtr.	1	n/a in 3rd qtr.	n/a in 4th qtr.	1	1 EA

To Be

P65-1 - Payroll accuracy rate FY17 (%)

Started Process to Procure System

- Built listing of functional requirements
- Analyzed costs
- Prepared RFP
- Secured funding....

**BUDGET
CRISIS**

- Cancelled RFP and project funding reverted

Focused on Improving the Process & Data

- No point in building dashboards if data not good or not tracking meaningful measures
- Went to **Plan B**: Gather & graph the data in Excel
 - Still wanted to greatly improve performance management process
 - Regular meetings to review with directors, deputy county managers
 - ✓ Not just a checkbox exercise
 - ✓ People are looking at this
 - ✓ It's important
- AND THEN.....ICMA discontinued Performance Platform

Still needed a Replacement for ICMA Platform

- Found **OpenGov** – July 2016
- How we got it approved?
 - Replacement for the ICMA Performance Platform
 - Didn't need IT analysis – system replacement & offered functionality that couldn't be built internally
 - Cost effective
 - Didn't need to seek large budget as we were just coming off the budget crisis
 - Public sector specific functionality
 - Procurement – utilize GSA
- Contract approved in Sept 2016

System Implementation

Phase I

- Financials

Late
2016

Phase IIA

- Comparisons – CivicDashboards

Phase IIB

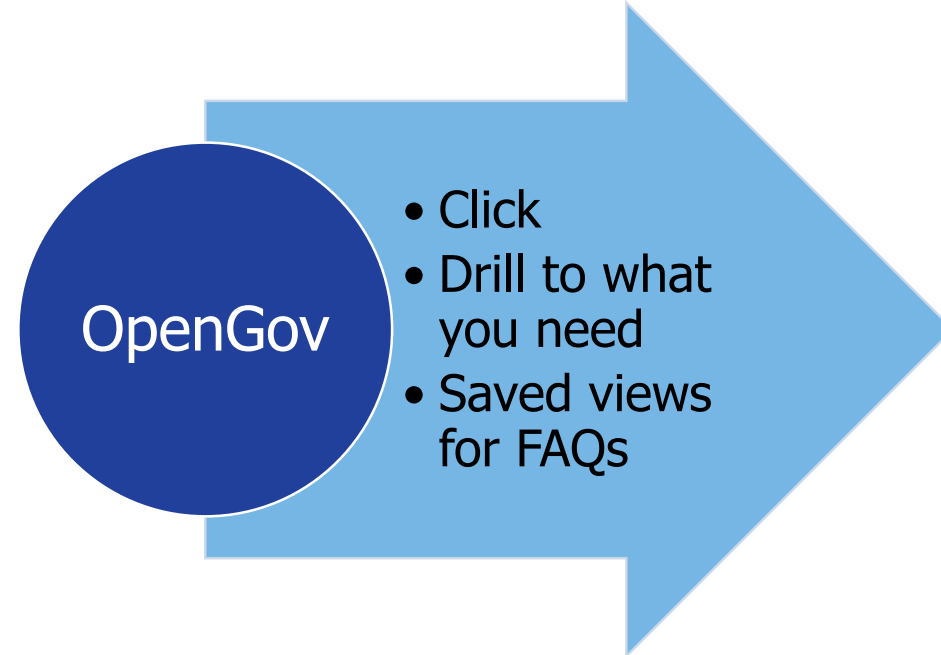

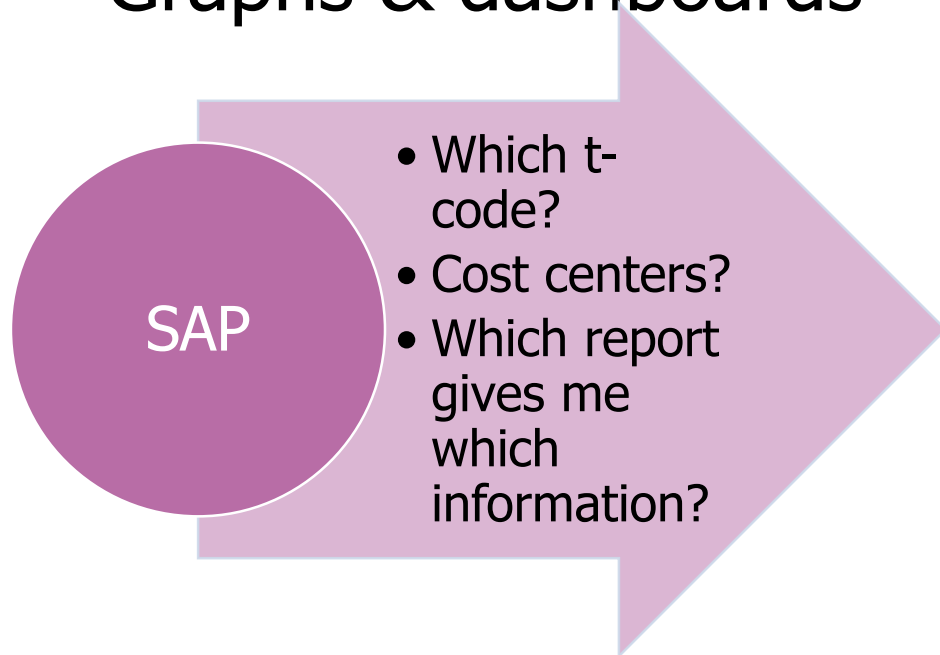

- Performance Dashboards

Phase I: Financials

Late
2016-
Early
2017

- OpenGov Intelligence
 - Load budget & actuals from SAP
 - Enhance transparency
 - Data more accessible, easy to use
 - Graphs & dashboards

Transparency

- Used OpenGov Intelligence to build transparent dashboards
<https://www.bernco.gov/finance/opengov-financials.aspx>

Late
2016-
Early
2017

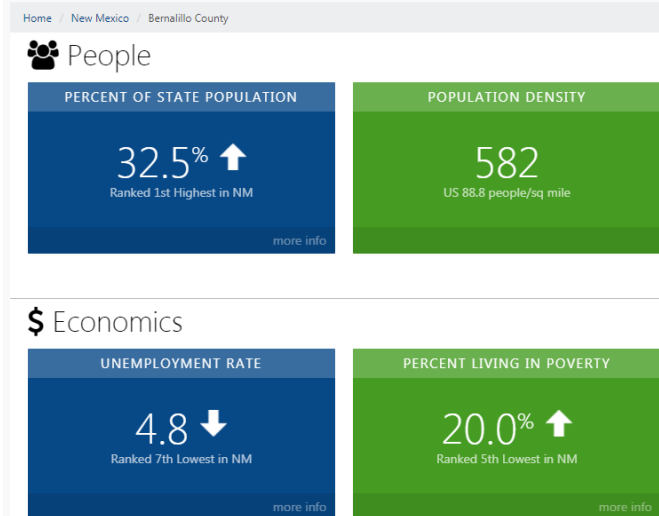

Phase IIA: Comparisons

- CivicDashboards.com

- Provides data for all municipalities on population, unemployment, income, crimes, housing, building permits, insurance, education
- Easy side by side comparisons
- Easy to build dashboards (with OpenGov)

Unemployment Rate

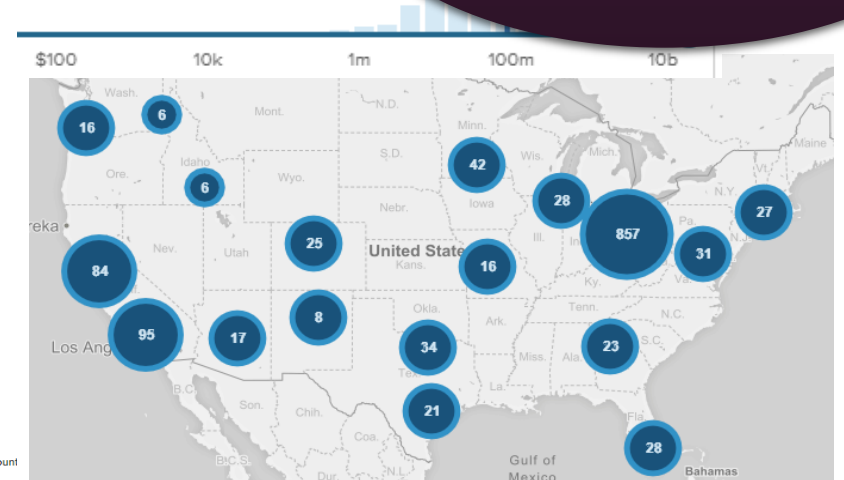

- OpenGov Network

- Compare to other OpenGov customers based on population and revenues

Currently have 11 comparison dashboards

Early 2017

Phase IIB: Performance

• OpenGov Open Data Platform

➤ Datasets from all systems

- Download data to Excel, upload to Data Platform
- Build templates for summary/non-system data
- Machine readable

➤ Dashboard Builder

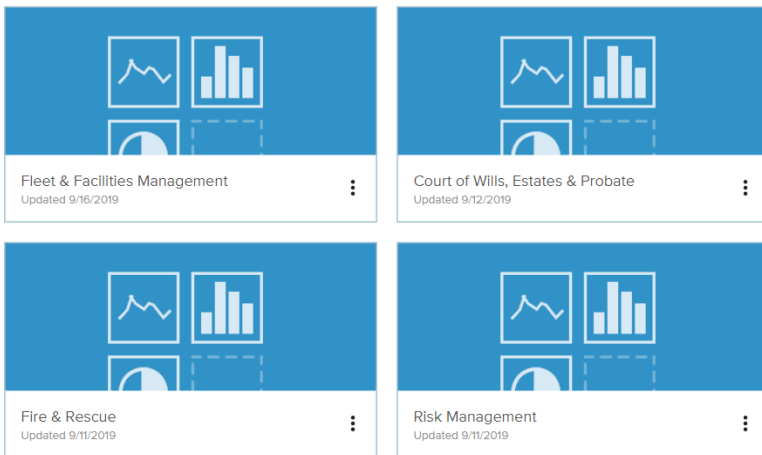

- Built dashboard for each department

Piloted this rollout initially with 7 depts. & ~50 measures (Jan-Feb)

Early 2017

Then rolled out to all 35 depts. & over 300 measures by end of April

Performance Dashboards

O88-1: Establish Maintenance Schedule for Fleet FY17 (%)

Phase IIB: Performance

➤ ERP Integration

- Built interface from SAP to OpenGov for travel data to automate this process
- Later added more ETL (Extract Transform Load) interfaces
 - Credit Card data
 - Checkbook Register
- These replaced older transparency sites

Early
2017

3 SAP to OpenGov
ETLs

Automated data
extract from SAP

Load to secure
FTP site

Integrated to
OpenGov

Data...from ough to aha!

- Piloted dashboard build out with 7 depts.
- Talked a lot about their data:
 - Where does it come from (system, other)?
 - How & what can be extracted?
 - Data upload templates created
 - Summary data
 - Detailed data
 - How are the measures calculated?

Data gathering process & conversations were difficult at the start...had a lot to learn about what data was available & had to build our own process

Early
2017

Dashboard design

- Dashboard design
 - Had lots of ideas of how we wanted these to look
 - Easy to understand...if you have to think too hard then not a good dashboard
- Lots of long meetings with OpenGov development team...
- OpenGov trained us to build and maintain
 - More technical than we really wanted it to be (SQL)
- Standardized graph types for each category of performance measure

Built out ~350 webpages 5 goals, 35 depts. & over 300 measures by end of April

Early 2017

What we wanted
vs
What is possible

Got better once we got here

How to get to the dashboards?

Go-Live
May
2017

- BERNCO VIEW – County's transparency site

➤ Strategic Plan & Dept Performance web page

<http://www.bernco.gov/finance/strategic-plan-and-department-performance.aspx>

STRATEGIC PLAN & DEPARTMENT PERFORMANCE

What is the Strategic Plan?

What is the County's Mission?

What are the Strategic Plan Goals?

What is a Performance Measure?

What is an Objective?

What are Business Strategies?

How did we get here?

Who to contact for questions?

Government Accountability

Transparent & accountable use of taxpayer dollars

Public Safety

Community where residents are safe from crime & injury

Economic Vitality

Thriving, livable community with diverse economic opportunities

Community Health

Healthy and active community with access to cultural amenities

Public Infrastructure

Meet community needs by supporting infrastructure owned by county or for public use (e.g. roadways, facilities, systems)

Design & Build Webpages

Built out ~350 webpages 5 goals, 35 depts. & over 300 measures by end of April

How to bring this all together?

- Webpages were built to make performance data accessible to public
- “Live, interactive” strategic plan
- Tell the story about each performance measure, not just dump data & graphs

P117: INVOICES PAID WITHIN 30 DAYS OF INVOICE RECEIPT

Measure Overview

#	Performance Measure	Strategic Plan Goal	Business Strategy
P117	Invoices paid within 30 days of invoice receipt (%)	 Government Accountability	 Increased Efficiency

Why is this measure important?

The results of this measure supports the automation of the Accounts Payable invoice payment process. It is important to monitor timeliness of invoice payments because the higher the percentage, the higher the efficiencies (e.g., less time spent answering vendor inquiries). Timely payment of invoices also assists in supporting the business community.

Where does the data come from?

SAP ECC System; Run Payment Register Report, run variant and export to Excel

How is the measure calculated?

Calculate the total number of days between the invoice date and the payment date; sum the number of rows that have 30 or less days; divide by the total number of invoices to calculate the percentage

Who to contact if you have questions?

[Robert Martinez](#)

Additional Information

Embedded the OpenGov Graphs

We currently have ~1400 tiles in performance dashboards

FY19 TARGET		FY20 TARGET		TREND ANALYSIS	
83%		85%			
% paid within timeframe		% paid within timeframe			
P117: Invoices paid within 30 days of invoice receipt (%)					
Strategic Plan Goal:	 Government Accountability	Business Strategy:	 Increased Efficiency

Fiscal Year 2019 Dashboard Report

- [Dashboard](#)
- [Report](#)

We currently have
61 stories

General Fund Revenues

1.0 General Fund Revenues (Qtrly)

General Fund revenues by source. Major sources of revenue come from Property and Gross Receipts Taxes. Other sources tax, fee, license, etc.

Updated 7 weeks ago

1.0 GF Revenue (Qtrly) – The County has collected \$316.5 million in revenue which is 107.3% of the budgeted revenue for fiscal year 2019. It exceeded its budget by \$21.6 million. The revenue increase is primarily due to gross receipts tax (GRT) collections and investment income cumulatively exceeding budget projections by \$16.7 million. The growth can primarily be attributed to 1/16th Public Safety and 1/8th Hold Harmless Gross Receipts Taxes (GRTs) that were enacted in fiscal year 2018.

New Mexico Taxation and Revenue department distributes GRT revenues on a two-month lag basis, therefore fiscal year 2018 only reflects 10 months of these enactments compared to fiscal year 2019 which has 12 months of GRT distribution.

Health & Public Safety Division Expenses

2.5 Health & Public Safety Division Expenses GF (Yrly)

Quarter-to-date yearly view of actual expenditures for the division.

2.5 Health & Public Safety Division Expenses GF (Yrly) – Health and public safety expenditures totaled \$91.2 million, \$74.6 million or 81.9% was for salary and benefits. Overtime was \$8.7 million or 9.5% of the division expenditures. Non-payroll which includes projects and contractual services makes up \$4.8 million or 5.2% while restricted costs such as, law enforcement insurance and insurance deductibles make up \$2.4 million or 2.6% of expenditures. The remaining \$700 thousand or 0.7% of expenses for the division is made up from direct asset purchases and travel and training. Health and public safety ended the fiscal year \$6.6 million, or 7.9% more than fiscal year 2018. There were several factors that increased their expenditures this fiscal year.

Health & Public Safety Division Salary vs. Operating Expenses

Public Safety Division Salary vs. Operating Expenses

Quarter-to-date yearly view of salary vs. operating expenses for the division.

The main drivers are fire and rescue salary and benefits increased approximately \$800 thousand over fiscal year 2019 mainly attributed to increased firefighter count, increased salaries and regular overtime, as well as a \$300 thousand purchase of SCBA air-packs. Youth Services Center (YSC) sustained a \$387 thousand increase to meal supplies, law enforcement insurance premiums as well as one-time office expenses. Animal care Services payroll increased over \$11 million with the addition of new facility staffing. The Sheriff's office payroll increased by \$3.4 million due to negotiated pay raises and 9 new deputies and a Sergeant being added. Emergency management and emergency communications had little change in comparison.

Dashboards in Performance Platform

We currently have 30 operational dashboards + 34 department performance dashboards

Constituent & Support Services Contact Center Operational Dashboard

Bernalillo County's Contact Center is your one-stop connection for everything BernCo. We serve as a single point of entry for information, and resolution of service requests. From internal facility requests to road reports, animal concerns to inmate information, we are here to deliver information and resources to you. We serve constituents and our county colleagues with passion and compassion, helping you navigate your way through county services and resources.

CC1 - Total Incoming Calls from Jan 2017 to Jul 2019 (CSQ Detailed Call Report)

CC2 - Total Incoming Calls by Line of Business from Jan 2017 - Jul 2019 (CSQ Detailed Call Report)

Making lots of data manageable & understandable

Still evolving & growing

- Working towards data driven decision making
- Having the right tools & good process helps
- Focus first is on having depts. engaged in analytics & performance
